Unit K-4  
Miami, FL 33156

Dear Jorge:

Congratulations! You have completed the requirements for the Marine Industry Certification (MIC), a program to create standards in the marine industry to meet increasing customer expectations. The MIC Program is designed to highlight, for the customer, those marine professionals--manufacturers, dealerships and individuals--who have invested in and are committed to these standards.

By taking your standards to the next level and completing these individual requirements for the MIC program, you have shown your commitment to increasing customer satisfaction in the marine industry! You have elevated yourself above your peers by attaining individual certification and specializing in Technical. Enclosed is your personal certificate.

We look forward to continuing our partnership with you to exceed customer's expectations in the marine industry!

Regards,

Marge Eckenrood  
MIC Administrator
